SUMMARY

Full Stack Software Engineer with 1.5+ years building production RESTful APIs, microservices, and full-stack web applications. Proficient in **Node.js (NestJS)**, **Next.js**, **Angular**, **PostgreSQL**, and **Azure/AWS**; experienced delivering scalable, multi-tenant SaaS systems using **gRPC**, **CQRS**, **Docker**, and ML/NLP integrations.

EDUCATION

NED University of Engineering & Technology — CGPA: 3.32 / 4.00 Karachi (2022–Present)

- B.S. Computer Science & Information Technology

WORK EXPERIENCE

QBS Co.

Associate Software Engineer

(Feb 2026 – Present)

- Architected **VersEye** platform modules — **IAM Console** with **Role-Based Access Control (RBAC)**, **Employee KPI Dashboard** (9 metrics, data visualization), and **Model Management** review panel — reducing enterprise onboarding time by 40%.
- Built a **Next.js Monorepo** frontend integrating 10+ RESTful API endpoints across distributed backend services with full authentication and authorization flows.

QBS Co.

Trainee Software Engineer

(Nov 2025 – Jan 2026)

- Deployed **microservices** with **Docker**, **gRPC**, and **CQRS**, reducing inter-service latency by 25%; built **Workspace Management** and **Employee Monitor** modules for **VersEye**, reducing tracking overhead by 30%.
- Built a **Neo4j** recommendation engine and **WhatsApp automation service** for **Ajeeks**, driving personalized suggestions via graph traversal.

KoderLabs

Associate Software Engineer

(Mar 2025 – Oct 2025)

- Built scalable multi-tenant SaaS APIs using **NestJS (TypeScript)** and **.NET Core** with **Clean Architecture**; integrated **Azure Functions**, **AWS S3**, and **SignalR** for event-driven scalability.
- Optimized **PostgreSQL** with **PostGIS** and **Google Maps API**, reducing geospatial query response time by 35%; managed CI/CD pipelines and led code reviews in Agile sprints.

PROJECTS

TrackWise – AI-Powered Personal Finance Platform

(May 2025 – Present)

- Built a full-stack finance platform (**NestJS**, **PostgreSQL**, **Angular**) with an AI-driven **NLP** pipeline that auto-categorizes transactions with 90% accuracy.
- Deployed on **Vercel** and **Render** with **Azure PostgreSQL**, JWT authentication, and automated email alerts for high-availability operations.

CourseFlow – Constraint-Based Course Scheduler

(Oct 2024 – Jan 2025)

- Designed a **Flask** RESTful API using **Greedy** and **Backtracking** algorithms, generating conflict-free timetables across 50+ courses with zero scheduling conflicts.
- Built an admin dashboard with real-time constraint validation, reducing manual scheduling effort by 70%.

SKILLS

- **Backend:** Node.js, NestJS, .NET Core, Flask, RESTful APIs, gRPC, GraphQL, Microservices, CQRS, Clean Architecture, JWT/OAuth2
- **Frontend & Languages:** Next.js, Angular, TypeScript, JavaScript, Python, C#
- **Databases & Cloud:** PostgreSQL, PostGIS, MySQL, Neo4j; AWS S3, Azure (Functions, SignalR, PostgreSQL), Docker, CI/CD
- **AI, Testing & Tools:** NLP, ML Integration, Jest, Unit Testing, Integration Testing, System Design, Agile/Scrum, Git, Postman, Swagger, GitHub Copilot

ACHIEVEMENTS

Advanced to **Round 2 of KODERZ COMBAT** and competed in **Game of Codes V**; solved **240+ algorithmic problems** on LeetCode and HackerRank across data structures, dynamic programming, and graph algorithms.
